

COVERVIEW™

CONTEMPORARY IN-WALL CAMERA ENCLOSURE FOR SONY®* AND CANON®** PTZ CAMERAS

The Vaddio CoverVIEW was designed to allow system integrators a simple way to install PTZ cameras into a wall and still have complete pan and tilt capability. The system is comprised of two parts: a metal backbox and a curved, acrylic cover. The backbox has conduit knockouts on each side and mounting wings on each side. An adjustable tripod screw slot on the bottom of the box allows for fastening the PTZ camera to the box. The second piece

is the cover that provides a decorative and protective enclosure for the PTZ camera. The cover is made of ABS plastic and has a clear acrylic non-reflective lens mounted across the opening. The cover comes with two extruded plastic decorative trim clips that conceal the four mounting screws.

WHAT'S INCLUDED

The Vaddio CoverVIEW includes the following items:

- Attractive camera enclosure cover
- Plenum rated metal backbox with conduit knockouts
- Clear acrylic non-reflective camera lens
- Two extruded trim clips
- Mounting hardware
