

Release Notes for:

PCC PREMIER

Release Information:

8/7/2018

PCC Premier 2.1.0-Release

- New Features

- Added support for the PrimeSHOT 20 HDMI and WideSHOT SE cameras.
- Improved support for DocCAM 20 HDBT.
- Added the ability to disable Telnet and HTTP access to the device.
- Added the ability to configure HTTPS certificates from the web interface.
- Added camera standby control in the admin web UI.
- Improved the IP streaming performance.
- Added the ability to import configurations from previous firmware versions.
- Improved device security by disabling TLS v1.0 protocol, and disabling DES and 3DES TLS cyphers.
- Improved responsiveness when controlling HD-19 cameras.

-Fixes

- Fix for button LED state sometimes not reflecting actual state and failing to update until a reboot.
- Fix for some data not being propagated immediately to the touch UI.
- Fix for intermittent preset storing issue on ConferenceSHOT 10 over RS-232.

-Known Issues

- Streaming may not function properly if the PCC Premier is put into standby while streaming cameras are still actively connecting to the controller. This can be fixed by disabling and re-enabling the camera bus.

11/27/2017

PCC Premier 2.0.0-Release

- Added support for DocCAM 20 HDBT and RoboSHOT IW.
- Added an indication on the web UI when a camera is reachable, but not supported by the system.
- Added ability to recalibrate motors for applicable cameras connected over serial.
- Improved camera UI labeling.
- Updated system time zone data.
- Improved ability to receive audio as well as video IP streams from supported cameras.

12/8/2016

PCC Premier 1.1.3-Release

- Improved support in LCD UI for storing color information in presets for RoboSHOT 12 & 30 HDBT cameras.
