

# USB Gamepad Interoperability Report

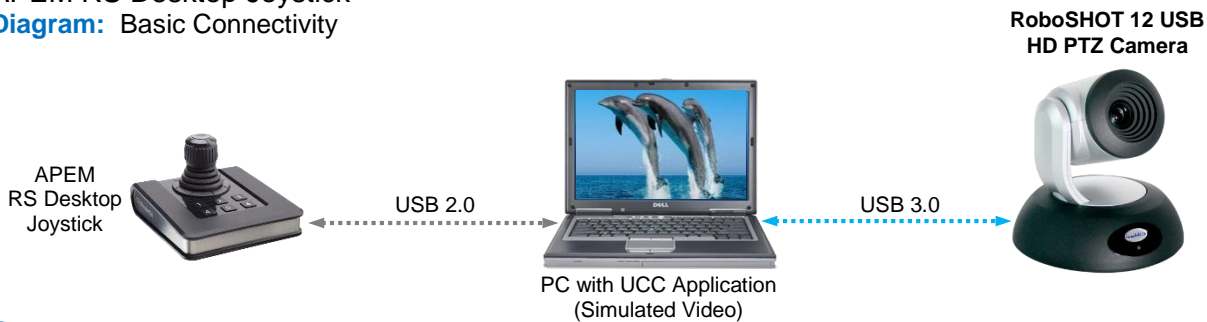

## Supported Part Numbers

- AV Bridge MATRIX PRO (1.0.1): 999-8230-000 (North America), 999-8230-001 (Int'l)
- RoboSHOT 12 HDMI (1.0.1): 999-9940-000 (North America), 999-9940-001 (Int'l)
- RoboSHOT 30 HDMI (1.0.1): 999-9943-000 (North America), 999-9943-001 (Int'l) - Black camera version  
999-9943-000W (North America), 999-9943-001W (Int'l) - White camera version
- RoboSHOT 12 USB (1.0.0): 999-9920-000 (North America), 999-9920-001 (INTL)

## Supported Device

APEM RS Desktop Joystick

**Diagram:** Basic Connectivity

## Supported Functionality

### Movement

- Up = tilt down
- Down = tilt up
- Left = pan left
- Right = pan right
- Clockwise = zoom in
- Counter clockwise = zoom out

### Preset Recall

- Buttons 1-6 on the joystick will recall presets 1-6 stored in the camera. It will recall the preset based on the parameters saved in the preset (Tri-Synchronous Motion, Color Scenes etc...).

## Browser Interoperability

Browser/OS	Windows	OSX	Linux
Firefox	Supported	Supported	Supported
Chrome	P [1]	P [1]	Supported
Safari	Not Applicable	Not Supported	Not Applicable
IE 8-10	Not Supported	Not Applicable	Not Applicable
Spartan (IE 11)	Y [2]	Not Applicable	Not Applicable

P [1] - Extremely Buggy

Y [2] - Microsoft claims the API will be supported in Windows 10/Spartan web browser. This configuration has yet to be tested.

\*Depending on the OS/Browser the user may need to press one of the buttons on the joystick for the browser to recognize the game pad.

## Google Chrome Notes:

1. If the page is refreshed the connection between the Web UI and the USB Gamepad loses connection. In most cases a disconnect/reconnect will resolve; in some cases the browser must be restarted.
2. If a new tab is opened in the browser the connection is lost [Disconnect and reconnect gamepad to computer to resolve].
