Vaddio's Camera Wall Mount Line Expands

MINNEAPOLIS, MN (June 11, 2007) – Vaddio is pleased to announce the latest additions to their Thin Profile wall mount brackets – a line for videoconference manufacturers' PTZ cameras and codecs. This new line of Thin Profile brackets will be launched at InfoComm 2007 in Anaheim, California. Vaddio is located in booth #4050 where our complete line of cameras and camera control equipment will be on display.

Thin Profile Wall-Mount Brackets for TANDBERG® Precision HD™ and Wave II™ Cameras, Polycom® PowerCam™ and EagleEye™, as well as LifeSize® HD PTZ Camera were created to provide an easy way to install these PTZ cameras for a variety of room integration projects. Wall Mount Shelf systems are also now available for both the TANDBERG Set-top series of codecs and Polycom's VSX™ series set-top units too.

“With more customers installing flat panel monitors, and additional cameras with their systems, there was a need for a reliable wall mounting system,” said Rob Sheeley, president of Vaddio. “All of our mounts were designed to fit the specific products that they were intended to be used with. The end result is a quality, custom-fit bracket.”

All of the mounts come standard with a black powder coat finish, and can be mounted directly to a wall, or an appropriately sized electrical box. Leveling is accomplished through the opposed slots on the back, on either side of the cable access hole.

About Vaddio:

Vaddio is the leading designer and manufacturer of specialty PTZ cameras and high-end camera control systems used in the broadcasting, audio/visual and videoconferencing industry. Headquartered in Minneapolis, MN, Vaddio also has operations throughout the Americas, as well as sales and support partners throughout the world. More information can be found on the Vaddio website, www.vaddio.com or at (800) 572.2011.
