**Vaddio Showcases New ProductionVIEW HD, Quick-Connect CCU,
IN-Wall and Rack Enclosures at InfoComm 2008**

Vaddio to exhibit and present at the Las Vegas event, June 18, 2008

MINNEAPOLIS, MN (June 11, 2008) – Vaddio, the leading manufacturer and OEM distributor of specialty PTZ cameras and high-end camera control systems used in the broadcasting, audio/visual and videoconferencing industries, announced it will exhibit the latest in camera control technology and Cat. 5 cabling systems at InfoComm 2008, Las Vegas, Nev., June 18 - 20, 2008, booth C1344. The event brings over 32,000 AV professionals from over 80 countries.

The newest addition to the Vaddio product line, **ProductionVIEW HD**, is a multi-camera control system designed to handle the most demanding live broadcast or staging events, yet it's still simple enough to allow a novice to shoot like a pro. ProductionVIEW HD integrates PTZ camera control and multi-format HD/SD live switching with real-time graphics and effects into one easy-to-use control console.

Debuting for the first time at InfoComm, the Vaddio **Quick-Connect CCU** takes our Cat. 5 cabling systems a step further by enabling you to adjust IRIS, GAIN, COLOR and DETAIL with the turn of

a knob. You can *finally* take control of PTZ Camera image output – allowing you to easily adjust each camera individually and match multiple cameras.

Our completely redesigned **IN-Wall Enclosures** are an attractive way to mount PTZ cameras on a wall where room aesthetics are critical. They use the depth of the wall cavity to recess the camera in to the wall, minimizing the camera's extension into the room providing a more polished look. These systems are designed and sized to fit the leading robotic PTZ cameras from Sony, Canon, LifeSize, TANDBERG and Polycom, as well as the Vaddio EZCamera Interface Module (EZIM) in the back of the box to enable use of Cat. 5 Cabling.

The new **ProductionVIEW Rack Enclosure** is the finishing touch to whatever ProductionVIEW system you choose. Complete with a sliding shelf in the lower rack bay, the rack enclosure fits large HD switchers/mixers or any of the ProductionVIEW consoles. With a smaller footprint than the Vaddio Rack Console, the ProductionVIEW Rack Enclosure is also deeper and can easily accommodate rack mount equipment up to 18" deep in the lower rack bay, as well as a variety of rack mount equipment in the upper rack bay.

Stop by booth C1344 to see our complete line of cameras and camera control equipment.
