

Vaddio Product Integration Vital Part of Award-Winning Restaurant Installation

AVI-SPL Incorporates Vaddio Equipment into STATS Sports Restaurant AV Project

PRODUCTS FEATURED IN INSTALLATION:

DOMEVIEW 70 INDOOR PENDANT CAMERA SYSTEM
999-9100-070

PRODUCTIONVIEW FX
999-5300-001

"We've always had great success using Vaddio products so we knew they would be perfect for this application," says Bill Smedley, project engineer for AVI-SPL, the venue's system integrator. "Vaddio's products are user-friendly, so there is no in-depth training -- anyone can use them. When you press the button on their equipment, it actually does what is says it's going to do."

Vaddio, the leading manufacturer and OEM distributor of camera control systems, supplied the award-winning, Atlanta-based STATS Sports Restaurant with multiple camera solutions for its 70+ monitors, touch panels and preview monitors placed throughout the building.

The Objective

The ultimate goal of the hospitality project was to create a seamless integration of technology and systems, yet keep it simple enough to leave control to the end-users.

Vaddio Product Integration Vital Part of Award-Winning Restaurant Installation

"We've always had great success using Vaddio products so we knew they would be perfect for this application," says Bill Smedley, project engineer for AVI-SPL, the venue's system integrator. "Vaddio's products are user-friendly, so there is no in-depth training -- anyone can use them. When you press the button on their equipment, it actually does what it says it's going to do.

Vaddio DomeVIEW 70 Indoor Pendant Camera System

Vaddio's Long-Range DomeVIEW 70 systems are placed throughout the venue's five bars located on three levels. The live video feeds are then incorporated into a variety of other sources including sports games and computer-generated images for advertising, logos, daily specials and upcoming events. Picture-in-picture allows combinations from the DomeVIEW cameras to be displayed on any of the monitors and projectors located throughout the restaurant. Streaming encoders can deliver the video over the Internet.

During special remote broadcasts, Atlanta's Sports Radio 790 The Zone broadcasts live from a glass-enclosed booth specifically designed for the station's private use. Situated in the center of the restaurant's main level, passers-by can sneak a peak at the pro athletes being interviewed, while Vaddio's DomeVIEW 70 camera system allows dine-in patrons to watch the televised broadcasts throughout the entire restaurant.

Vaddio ProductionVIEW FX

Vaddio's ProductionVIEW FX controller and mixing console distributes the selected camera sources to the switch.

"We needed the ability to control multiple cameras and route through one switch," explained Smedley. "Vaddio's ProductionVIEW FX allows the Video DJ control of multiple cameras, the capability to preview all of the camera inputs at once and cue the output for sourcing to the switch. This way, they know exactly what each camera is seeing and the ability to preview the output mix to the switch. The seamless integration of ProductionVIEW FX and the DomeVIEW 70 cameras made the installation process quick and easy."

"We have never had any complaints when it comes to Vaddio products."

Venue Details

The 15,000 square foot venue boasts over 70 HD flat screen monitors, a custom-designed 33 foot U-shaped color ticker display with continuous updates of statistics and financial data via programmable dedicated Internet connection, 15 separate theme-designed rooms throughout three levels, a large roof deck and sliding roof system, and an HD multi-zone audio system that is high-impact, routed to each of the 15 rooms or deck.

Vaddio is the leading manufacturer and OEM distributor of specialty PTZ cameras, high-end camera control systems and contemporary furniture used in the broadcasting, audio/visual and videoconferencing industries. Headquartered in Minneapolis, MN, Vaddio also has operations throughout the Americas, as well as sales and support partners throughout the world. More information can be found on the Vaddio website, www.vaddio.com or at (800) 572.2011.
